This mockup shows how a pull works and how a pulled idea is displayed.

1. How a pull works?

- When a piece of text is select, a "Pull" button is displayed.
- When the user click on the Pull button, the IdeaMagnets Sidebar shows up.
- The user (Sarah) can then choose or input a magnet, add an annotation, add tags, and submit the pull.

2. How a pulled idea is displayed?

- In the sidebar, an idea pulled by Steve is displayed.
- The chosen magnet -- Magnet 1 -- is displayed first.
- The pulled text is in grey.
- The annotation is below the pulled text.
- A reply button and a share button are displayed in the lower-right corner.

This mockup shows an initial design of how a user can review magnets in a page.

1. Magnets in the page

All magnets in this page are displayed as a list.

2. A magnet

Under a magnet, all ideas pulled by the magnet are displayed.

- For each idea, its associated text is displayed in grey. A number indicating how many times the text has been tagged is shown.
- The annotation is displayed below the text.

3. TODO: User actions when reviewing idea magnets.
